SUMMARY

I have 12+ years of experience in enterprise web application development with expertise in .NET, React, and the Azure stack. My experience spans the full development lifecycle, including analysis, design, prototyping, implementation, and team leadership. Recently, I have been actively working with AI-driven solutions, including agentic workflows, MCP servers, connectors, and building AI agents using RAG and embedding-based databases.

CORE COMPETENCIES

C# / .NET: C#, .NET Core, .NET Framework, ASP.NET MVC, ASP.NET Web API, Multithreading

API: RESTful & GraphQL API design and development, MCP Server integration, Service-Oriented Architecture

Data: SQL Server, Entity Framework, LINQ, SSIS, embedding-based vector databases

Cloud: Azure Functions, Azure Key Vault, Azure Active Directory, Blob Storage, Azure PaaS/SaaS

Microservice / Architecture: Microservices architecture, cloud solution design, legacy-to-cloud modernization, system design

Messaging: Azure Service Bus, Azure Event Hub

DevOps: CI/CD pipelines, Docker, containerized deployments

Observability: Azure Monitor, Application Insights, distributed tracing & logging for microservices

Security: Azure Key Vault (secrets management), Azure Active Directory (identity & access)

React: React JS, component-driven front-end development, client prototyping

Testing: Unit testing, SonarQube static analysis, code reviews, WCAG / A11y accessibility compliance

AI: Agentic AI workflows, AI agents, RAG pipelines, MCP servers, embedding-based databases, Azure AI Fundamentals

CERTIFICATIONS & AWARDS

- Microsoft Certified: Azure Developer Associate (AZ-204)
- Microsoft Certified: Azure AI Fundamentals (AI-900)
- Star Performer, Globant — recognized by EY client for quality of work and timely delivery

EXPERIENCE

Project Lead

Persistent Systems Limited | Nagpur, India | Aug 2023 - Present

Client engagements: Honda Australia, Intuit

- Lead a cross-functional **.NET/Azure** team under Agile methodologies, owning **architecture** decisions, cloud solution design, and rollout of **agentic AI** development practices.
- Drive legacy-to-cloud modernization, re-platforming monolith services into **microservice**-based systems on **Azure Functions** and **SQL Server**.
- Design and integrate **MCP servers** and AI-driven workflows; build **AI agents** on **RAG** pipelines backed by embedding-based vector **databases**.
- Own service reliability and secrets management using **Azure Key Vault**, and data movement pipelines via **SSIS**.
- Set technical direction across **C#/.NET Core** implementation, currently extending the **API** layer with **GraphQL** alongside **REST/Web API**, deployed on **Azure Cloud**, with **Observability** (Azure Monitor / Application Insights) built

into service design; also own code review and delivery planning for two enterprise clients concurrently.

Senior Developer

Globant India Pvt. Ltd. | Pune, India | Mar 2019 - Aug 2023

Client engagements: EY

- Technically managed a developer team designing, building, and deploying applications on **.NET Core, C#, JavaScript, React JS, SQL**, and **Azure**.
- Built and presented a client-facing prototype that directly helped the marketing team win a new client for the product line — a strong signal of full-stack ownership from design to demo.
- Enforced **testing** discipline with **SonarQube** static analysis and unit testing, keeping code quality high across a multi-developer codebase.
- Owned effort estimation, client calls, sprint syncs, and code reviews; mentored junior engineers on **.NET** and **React** best practices.
- Delivered features spanning **C#, .NET Core, Web API**, multithreading, **SQL Server, Entity Framework, React JS**, and Azure **PaaS/SaaS** services — **Active Directory**, Blob Storage, **CI/CD** pipelines, **Service Bus, Azure Functions, Event Hub**, and **Docker**.

Senior System Engineer

Infosys Ltd. | Pune, India | Aug 2017 - Mar 2019

Client: Microsoft — Field and Project Service (FPS)

- Implemented Accessibility (A11y) compliance across the application, aligning UI and **API** layers with WCAG standards for a Microsoft production client.
- Managed delivery under strict timelines, covering effort estimation, code review, and **unit testing**.
- Built and extended web application features using **C#, Web API, SQL, JavaScript, React JS**, and **ASP.NET MVC**.

Software Engineer

Excellon Software | Pune, India | Aug 2014 - Aug 2017

Clients: RE, Bajaj

- Built and maintained an end-to-end Dealer Management System (DMS) spanning the full sales-to-service lifecycle for automotive dealerships.
- Delivered critical client change requests and new product features on a live production system.
- Developed core modules using **C#, .NET Framework, Entity Framework, SQL Server, LINQ**, and **ASP.NET Web API**.

EDUCATION

Bachelor of Engineering in Computer Science

Sipna College of Engineering & Technology, Amravati | 2010 - 2014 | GPA: 8.14 / 10

LANGUAGES

English, Hindi, Urdu, Arabic
