SUMMARY

Project Lead with 12+ years of experience building enterprise web applications on .NET, Azure, and React. Lead cross-functional teams through the full lifecycle (analysis, design, prototyping, delivery) for global clients including Honda Australia, Intuit, EY, and Microsoft. Currently drive legacy-to-cloud modernization into Azure microservices and own the rollout of agentic AI practices, including MCP servers, AI agents on RAG pipelines, and embedding-based vector databases.

CORE COMPETENCIES

Languages & Frameworks: C#, .NET Core, .NET Framework, ASP.NET MVC, ASP.NET Web API, Multithreading, LINQ, Entity Framework

APIs & Integration: RESTful APIs, GraphQL, MCP Server Integration, Service-Oriented Architecture

Architecture: Microservices, Cloud Solution Design, Legacy-to-Cloud Modernization, System Design

Cloud (Azure): Azure Functions, Azure Key Vault, Azure Active Directory, Blob Storage, Azure PaaS/SaaS, Azure Service Bus, Azure Event Hub

Data: SQL Server, Redis, SSIS, Embedding-Based Vector Databases

AI: Agentic AI Workflows, AI Agents, RAG Pipelines, MCP Servers, Embedding-Based Vector Databases, Azure AI Fundamentals

DevOps & Observability: Git, Azure DevOps, CI/CD Pipelines, Docker, Containerized Deployments, Azure Monitor, Application Insights, Distributed Tracing & Logging

Front-End: React JS, Component-Driven Development, Client Prototyping

Quality: Unit Testing, SonarQube, Code Reviews, WCAG / A11y Accessibility

Leadership & Delivery: Agile, Team Leadership, Effort Estimation, Delivery Planning, Client Communication, Mentoring

CERTIFICATIONS & AWARDS

- Microsoft Certified: Azure Developer Associate (AZ-204)
- Microsoft Certified: Azure AI Fundamentals (AI-900)
- Star Performer Award, Globant: recognized by EY client for quality of work and timely delivery

EXPERIENCE

Project Lead | Persistent Systems Limited | Nagpur, India | Aug 2023 – Present

Client engagements: Honda Australia, Intuit

- Led a cross-functional .NET/Azure team of 5 under Agile methodologies, owning architecture decisions, cloud solution design, and rollout of agentic AI development practices.
- Drove legacy-to-cloud modernization, migrating 2 monolith services into microservice-based systems on Azure Functions and SQL Server.
- Built Azure Functions for Honda Australia, cutting cloud cost by ~30-35%.
- Improved the performance of a key module by ~40% through query and index optimization in SQL Server.
- Designed and integrated MCP servers and AI-driven workflows; built AI agents on RAG pipelines backed by embedding-based vector databases.
- Owned service reliability and secrets management using Azure Key Vault, and data movement pipelines via SSIS.
- Set technical direction across C#/.NET Core implementation and extended the API layer with GraphQL alongside REST/Web API on Azure Cloud.
- Built observability (Azure Monitor / Application Insights) into service design.
- Owned code reviews (Git) and delivery planning for two enterprise clients concurrently.

Senior Developer | Globant India Pvt. Ltd. | Pune, India | Mar 2019 – Aug 2023

Client engagements: EY

- Technically managed a team of 3 developers who designed, built, and deployed applications on .NET Core, C#, JavaScript, React JS, SQL, and Azure.
- Built and presented a client-facing prototype that directly helped the marketing team win a new client for the product line.
- Enforced testing discipline with SonarQube static analysis and unit testing, reducing bugs by 10%.
- Owned effort estimation, client calls, sprint syncs, and Git-based code reviews; mentored junior engineers on .NET and React best practices.

- Delivered features spanning C#, .NET Core, Web API, multithreading, SQL Server, Entity Framework, Redis, React JS, and Azure PaaS/SaaS services (Active Directory, Blob Storage, Service Bus, Azure Functions, Event Hub, Docker). Managed CI/CD pipelines in Azure DevOps.

Senior System Engineer | Infosys Ltd. | Pune, India | Aug 2017 – Mar 2019

Client: Microsoft, Field and Project Service (FPS)

- Implemented Accessibility (A11y) compliance across the application, aligning UI and API layers with WCAG standards for a Microsoft production client.
- Managed delivery under strict timelines, covering effort estimation, code review, and unit testing.
- Built and extended web application features using C#, Web API, SQL, JavaScript, React JS, and ASP.NET MVC.

Software Engineer | Excellon Software | Pune, India | Aug 2014 – Aug 2017

Clients: RE, Bajaj

- Built and maintained an end-to-end Dealer Management System (DMS) spanning the full sales-to-service lifecycle for automotive dealerships.
- Delivered critical client change requests and new product features on a live production system.
- Developed core modules using C#, .NET Framework, Entity Framework, SQL Server, LINQ, and ASP.NET Web API.

SELF PROJECTS

Locayaan: Regional News Discovery App for the GCC

.NET API, React, RAG, Qdrant (vector database), Gemini

- Built a regional news discovery app focused on local news across the GCC, with a live feed organized by country and topic.
- Designed a RAG pipeline that collects articles from RSS sources and indexes them in Qdrant.
- Enabled natural-language questions answered by Gemini, with answers grounded in the indexed articles.

AyahCompass: Mood-Based Quran Verse Companion (PWA)

.NET API, Quran MCP server (mcp.quran.ai), Vanilla HTML/JS

- Built a lightweight, responsive Progressive Web App where users pick an emotional state or describe their situation in free text and receive a relevant ayah with Arabic text and English translation.
- Integrated the Quran MCP server (mcp.quran.ai) to fetch verses live through a .NET API.

EDUCATION

Bachelor of Engineering in Computer Science, Sipna College of Engineering & Technology, Amravati | 2010 – 2014 | GPA: 8.14 / 10

LANGUAGES

English, Hindi, Urdu, Arabic
